# DRONE TECHNOLOGY

## Learn to make money flying a drone!

Career opportunities are increasing in the exciting and rapidly growing field of drone technology.

This 22-hour course will enable you to acquire the technical training needed to explore exciting business opportunities in the unmanned aircraft systems (UAS) industry.

This instructor-led training class will cover Federal Aviation Administration (FAA) rules and regulations, airspace classifications, risk assessment tools, aeronautical decision making, weather awareness and more. Students will complete a combination of classroom training and practical hands-on flight experience. Practice tests for the Part 107 FAA exam to become FAA Certified Drone Pilots are also included.

This course is offered in partnership with

**Date: April 29 - May 4**

**Location: SCTC Griffin Campus  
Building 100**

**Time: M-F 5:30 pm, Sat 9:00 am**

**Cost: \$900/person now through March 31  
\$1000/person after March 31**

## Commercial Applications for Drones:

Agriculture  
Photography  
Delivery Services  
Emergency Services

Utility Companies  
Real Estate  
Engineering  
Media
