

REDMOND PATRIOTS

OUR MISSION:

*"Promoting American Exceptionalism
through Community Education"*

(Issued April 26, 2021)

Critically Important Redmond School Board Election

PLEASE VOTE. Four of the five Redmond School Board positions are on the ballot. The future direction of Redmond Schools will be decided by Your Choices.

There is an effort to turn Redmond Schools into a breeding ground for misinformed "Equity Warriors". Instead of focusing on Education to prepare graduates for productive roles in life, they intend to focus on INDOCTRINATION.

Redmond deserves clear-thinking, pro-American board members who will take action to Improve EDUCATION ... NOT Promote INDOCTRINATION.

Our best hope is to vote for these "Common Sense" Candidates ...

Position 1: Shawn Hartfield

Position 2: Michael Summers

Position 3: Jill Cummings

Position 4: Keri Lopez

RANDOM THOUGHTS

- UN estimates 130 million will die worldwide as a direct result of lockdowns.
- The NRA murders 0 people and receives \$0 in government funds. Planned Parenthood kills 350,000 babies every year and receives \$500 million in tax dollars annually.

*"Reparations are the
extraction of money from
people who were never
slave owners to be given to
people who were never
slaves."*

Oregon Democrats Want to Scrap Graduation Requirements

At a loss for how to actually improve education in Oregon, Democrats have finally resolved to do something concrete: Burn down the entire system. Senate Democrats voted in lockstep to scrap graduation requirements for the next two school years and order a study to give them cover to do away with them permanently. Senate Bill 744 would cover up the damage of school closures and hurt kid's future potential.

"Democrats figure that the best way to cover up their responsibility for decades of public education system failures is to trash all traditional standards of learning," Senate Republican Leader Fred Girod (R-Lyons) said. "The reality is that this bill will artificially inflate graduation rates at the cost to our students' futures."

SB 744 would do away with all essential learning skill requirements and ban the State Board of Education from requiring students to show any competency in any academic content area. SB 744 passed over bipartisan opposition and now heads to the House for further consideration. *(Above abstract from: Oregon Catalyst, 4/22/21)*

Biden is Coming for Your Hamburger

He believes that Americans eat too much meat, which is bad for the earth, you see. No more 'chicken in every pot' ideas from this clown, in what's historically the most typical campaign pander to voters. He's coming for your meat now through his 'infrastructure' plan, a disguised placement of the green new deal, and demands that you to live poorer.

Biden's plan would require Americans to only consume about four pounds of red meat per year, or 0.18 ounces per day. It equates to consuming roughly one average sized burger per month.

So it's not good enough to just tax us and destroy our energy supremacy and kill off our jobs, and make way for Solyndra-style corruption -- Biden also wants to destroy America's cattle ranchers and control what you eat. (*Above abstract from: American Thinker, 4/25/21*)

And Sleepy Joe has an accomplice in his Anti-Beef efforts ...

Oregon Bill IP13 would criminalize raising food animals in the state, and reclassify animal husbandry practices as "sexual assault." The bill specifies that animals can only be eaten after dying of natural causes (*at which point, aged/diseased meat is not good*). Oregon's 12,000 beef producers raising about 1.3 million head of cattle are slated for elimination, as traditional farming and ranching is shut down in favor of lab-grown meat and indoor farms owned by the technocrats — a perfect way to force the population into perfect slavery. France Revolts Against Divisive Critical Race Theory

A massive group of former and current French military personnel signed an open letter this week warning of the imminent danger posed by so-called Anti-Racist ideology, and urging French President Emmanuel Macron to work quickly to prevent a civil war.

The letter was signed by 20 former French generals, 100 officers and over 1,000 other military personnel.

It accused the French government of kow-towing to destructive ideologies such as Anti-Racism and Islamism, which it said were being leveraged for the purposes of sowing unrest in French communities and risking a descent into full-blown civil war.

The signatories expressed grave concern with the government's push to deconstruct and decolonize its own history in an attempt to placate a growing Islamism that has wracked the nation with violence and argued that radical Islam is being used to subject neighborhoods to dogmatic rules that go against the French Constitution, creating an unconstitutional parallel Islamic state.

Critical Race Theory and the radical offshoot, Anti-Racism, have plunged America into violent unrest for over a year. America is not alone in this fight. Indeed, the New Racism has infected much of the West, and now it appears that it also threatens France with total political collapse.

Thankfully for the French, it looks like their military will not fall in line with the tyrannical dictates of Social Justice Dogma, and will step forward should they need to protect the citizens of the republic and their noble traditions.

On all accounts, American leadership might have something to learn from France (*Above abstract from: Western Journal, 4/22/21*)
