

V-Station® HD

Producer4 • Producer4S

Multi-Channel H.264 Video Recording System
With Project Media Management Software

The Affordable Way To Record & Stream
Multicam Video Projects From Windows-based
Laptops, Surface Pro Tablets, & Desktops

V-Station® HD

Producer4 • Producer4S

Easy & Cost-Effective Multi-Camera Video Production

The V-Station HD Producer4 series is the perfect way to do multi-cam/multi-angle video shoots on a limited budget. It's well-suited for "grab & go" shoots. The multi-channel video recording USB interface connects to your Windows-based laptop, desktop, or Surface Pro tablet's USB 3.0 port. Running the V-Station HD Project Media Management software on your PC, Producer4S becomes a very affordable way to bring multi-camera production values to video projects. It's simple to setup, efficient to use, and fast to transfer your video files to your NLE or to use V-Station HD PostTools. Fewer staff are needed to operate the Producer4 series than recording with individual camcorders or DVRs.

Monitor All 4 Channels Live

View all video angles together on your laptop PC or tablet and control the system with keyboard/mouse commands. If your PC has a touchscreen, use it to select and control your shots.

V-Station HD Producer4 Series Record Monitor Panel

4-Channel Synchronized Video Recording

The Producer4 series will make your post-production editing task much easier and faster because all the camera angles are automatically synchronized as you record—and when you transfer the video clips to your NLE system.

- Video Switcher**
 Using your PC's HDMI video output, switch live between cameras and send the program output to an HDMI monitor—al while simultaneously creating the EDL for post-production.
- Exclusive 5th-track "Line-Cut" Program Recording**
 Automatically record the live switched video output as a "line-cut" of the event being recorded along with the 4 video channel recordings.

Integrated Project Media Management Software

With its built-in SQL database media management system, the Producer4 series' clips are recorded and organized by project, reel, scene, shot and take numbers. This makes it simple to locate, backup or transfer projects to your NLE.

Producer4S Provides Enhanced Capabilities

Producer4S incorporates the V-Station HD AutoProducer software which provides a range of capabilities, including:

- Live Program streaming via RTSP or RTMP**
 Producer4S enables you to stream the program out directly to YouTube Live, Facebook Live, or to a 3rd-party CDN (e.g., Wowzer). There is no need for an external streaming device.
- Seamless "one-click" NLE Transfer via XML file**
 V-Station HD projects are transferrable to your NLE system with clips automatically organized into bins and sequences (generated from the EDL)—and are already synchronized. No more tedious hours trying to locate the desired shot. Premiere Pro, Final Cut Pro, and Vegas Pro NLE systems are supported.

Digital & Analog Video Input Flexibility

The Producer4 series' multi-channel video recording interface has 3 x HD/SD-SDI inputs, plus 1 input that can be switched to accept either an additional SDI or HDMI camera signal, or a VGA/DVI (from a 2nd PC), component, S-Video, or composite input.

Flexible Video Recording Resolutions & Containers

The Producer4 series provides a variety of H.264 recording options. Multiple recording resolutions (480i/576i, 720i/720p, 1080i/1080p), frame rates (24/25/30fps), and container type MP4 are all supported.

Flexible Audio Inputs

Selectable 4-channel (stereo) embedded digital audio from cameras or external 4-channel stereo analog audio synchronized to video.

Full-Featured Media Player

Even while recording, you can mark and play back previous shots using the built-in media player. Pull up the playlist by project and review footage. Log footage for each frame—making it easy to find.

V-Station HD Producer4 Series Media Player Panel

CAPABILITIES	
Simultaneous synchronized recording	Yes, up to 4 camera feeds
Multi-track video recording technology	Yes, 1080p up to 30 fps
Embed analog audio from external sources	Yes, 4 stereo channels
Monitor live all sources on same screen	Yes
Live switching to HDMI monitor/streaming device	Yes
Line-cuts with edit decision list creation	Yes
Upload program out video to YouTube, FTP Sites	Yes
Stream program out video to YouTube Live & Facebook Live & 3 rd -party CDNs	Yes, Producer4S model
Recording time 4 channels at 1080p30	Up to 80 hours with 1TB drive @ 6Mb/s
Multiple video input configurations	Yes (4 SDI or 3 SDI +1 HDMI or DVI-D, VGA, Composite, or S-Video)

MINIMUM PC REQUIREMENTS	
Producer4 & Producer4S	
CPU Intel i5 2.8 Ghz (quad core or higher, 4th Gen or higher), Intel HD Graphics 620 or higher or 4600 or higher, at least 8 GB RAM (recommend 12-16 GB), Windows 7 Professional x64/Windows 10 Home/Pro, SSD 256GB or larger, USB 3.0 port for multi-channel video interface unit.	
<i>* Optional 1TB data storage drive (D:) is recommended for holding large video files (USB 3.0 external drive or internal secondary drive).</i>	
If Using Optional V-Station HD PostTools Software On Same PC	
Windows-based laptop or desktop PC running Windows 7 Pro x 64 SP1 or Windows 10 Pro, build version 1906 or later. • CPU: Intel based i7 3.2Ghz (quad core, 4th Gen or higher), Intel on-board HD graphics 620 or 4600 and above. • RAM: 8GB (12-16GB recommended). • System and Data Storage: SSD 256GB or larger. Recommend additional storage drive or LAN storage for holding imported video files.	
ORDERING INFORMATION	
FV5503 V-Station HD Producer4	Includes: V-Station HD Project Media Management (PMM) software, multi-channel video recording USB interface, USB cable, 100-240VAC AC-DC adapter, HDMI to DVI-D adapter, VGA-DVI-D adapter, 4 x 3.5 mm to RCA female audio adapters. (Users must provide their own cameras and PC.) Full specifications available at FutureVideo.tv.
FV5505 V-Station HD Producer4S	Same as FV5503, but software includes live streaming and clip browser.
