Methods and definitions

European quarterly national accounts are compiled in accordance with the European System of Accounts 2010 (ESA 2010).

The preliminary flash estimate of the second quarter of 2021 GDP growth presented in this release is based on the data of 17 Member States, covering 93% of euro area GDP and 91% of EU GDP. The country coverage was not affected by the COVID-19 crisis.

Two statistical working papers present the preliminary GDP flash methodology for the [European estimates](#) and [Member States estimates](#). The method used for compilation of European GDP estimates is the same as for previous releases.

Revisions and timetable

With this preliminary flash estimate, euro area and EU GDP figures for earlier quarters are not revised.

All figures presented in this release may be revised with the GDP t+45 flash estimate scheduled for 17 August 2021 and subsequently by Eurostat's regular estimates of GDP and main aggregates (including employment) scheduled for 7 September 2021 and 18 October 2021.

Data on revisions for test estimations, showing that the preliminary flash estimation procedure is sufficiently reliable, are available in chapter 5 of the statistical working paper [Euro area and EU GDP flash estimates at 30 days](#).
